

WORLD OF RADIO #1181, produced May 7, 2003 by Glenn Hauser

- \*After two months, RFPI Costa Rica reactivated second frequency, 15039, so again audible in daytime, including WOR scheduled Fri 1930, Sat 1730, Sun 1830, Tue 1900; last repeats delayed one hour to one sesquihour for logistical reasons

- \*R. France International still heard on 2m hamband, 0100-0200 on 144.3 MHz, due south from Venezuela; an unsolved mystery for three years

- \*Call to Prayer stations in UK use 454-455 MHz band from mosques, instead of loud hailers from the roof; such as 454.7 scrambled; and 454.275; is this done in the US? We never hear a Call to Prayer over the air, but then in Enid there isn't even a synagogue, let alone a mosque

concerned about choice of Grace Digital Media as production house for US government TV broadcasts, since it is fundamentalist Christian 'rabidly pro-Israel'; BBG says no problem
